PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building production-grade SaaS platforms, AI/ML-powered applications, and secure payment systems using **Node.js, React, PostgreSQL, and OpenAI API**. Experienced in **Agile development, microservices architecture, CI/CD pipelines, REST API design, and cloud deployment on AWS**. Delivered Mentora — a real-world AI tutoring SaaS with Docker, semantic search, RAG pipelines, and RBAC. **Solved 400+ DSA problems on LeetCode & GeeksForGeeks**. Seeking a Junior Full-Stack / Backend / ML Engineer role to build scalable, impactful software.

TECHNICAL SKILLS

Languages	Python, JavaScript, Java
Frontend	React.js, Next.js, HTML, CSS, Tailwind CSS
Backend	Node.js, Express.js, TypeScript, REST APIs, JWT Authentication, RBAC
Databases	PostgreSQL, MongoDB, MySQL, SQL, Prisma ORM
AI / ML	LangChain, RAG Pipelines, TF-IDF, Cosine Similarity, OpenAI API, Scikit-learn, Pandas, NumPy
Cloud & Tools	AWS (EC2, S3, SES), Docker, Git, Linux, Postman
Practices	Agile / Scrum, System Design, RESTful Architecture, OWASP Security, Code Review
DSA	400+ problems solved — LeetCode, GeeksForGeeks

INTERNSHIP EXPERIENCE

Machine Learning & Database Intern — Elavate Labs | Remote

2 months | Python, PostgreSQL, Scikit-learn, Docker

- Optimised PostgreSQL queries, reducing average execution time by ~15% through index tuning and query restructuring.
- Designed SQL views and stored procedures for automated KPI reporting, eliminating manual data pulls.
- Built ML classification pipelines using Scikit-learn; supported end-to-end Docker-based deployment of ML services.

ENGINEERING PROJECTS

AI-Powered Tutoring SaaS Platform

github.com/munavvarshaikh314/mentora-backend | Node.js • React • Prisma • PostgreSQL • OpenAI API • Docker • AWS

- Engineered full production SaaS platform supporting student registration, mentor booking, and role-based dashboards.
- Designed microservice-style architecture separating authentication, payments, and recommendation services — improved API throughput by ~40% via Dockerised deployment and rate limiting.
- Built semantic search & recommendation engine using TF-IDF + cosine similarity, surfacing mentor matches with >85% relevance accuracy in user testing.
- Implemented JWT-based RBAC with granular permission layers across student, mentor, and admin roles.

Secure Payment Gateway System

github.com/munavvarshaikh314/payment-gateway | MERN Stack • Razorpay API • JWT • AWS SES • Two-Factor Authentication

- Implemented secure authentication using JWT + two-factor authentication, passing all OWASP Top-10 manual checks.
- Integrated Razorpay UPI/card payments achieving ~99.9% transaction success rate across 500+ test scenarios.
- Built admin dashboard to monitor real-time payment status and automated PDF invoice generation on successful transactions.

Real-Time Analytics Platform

github.com/munavvarshaikh314/realtime-analytics-project | Java • Spring Boot • Apache Kafka • WebSocket • Hibernate/JPA • H2/MySQL • Docker • DL4J • REST APIs

- Built an end-to-end real-time analytics system using Apache Kafka + Spring Boot, ingesting IoT, social media, and finance tick data via event-driven microservices.
- Implemented Kafka producers/consumers + stream processing to generate anomaly alerts, trending detection, and sentiment insights, persisting outputs to H2/MySQL (JPA/Hibernate).
- Developed a WebSocket live dashboard pipeline streaming real-time metrics, alerts, and predictions with sub-second latency for concurrent clients.
- Integrated DL4J LSTM time-series forecasting with async training, model persistence, and runtime inference for market prediction workflows.

EDUCATION

B.Tech in Information Technology | Universal College of Engineering, Mumbai | 2025

CERTIFICATIONS

- ✓ AWS Certified Cloud Practitioner
- ✓ Machine Learning Specialization — Andrew Ng (Coursera)
