PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building production-grade SaaS platforms, AI/ML-powered applications, and secure payment systems using **Node.js, React, PostgreSQL, and OpenAI API**. Experienced in **Agile development, microservices architecture, CI/CD pipelines, REST API design, and cloud deployment on AWS**. Delivered **Mentora** — a real-world AI tutoring SaaS with Docker, semantic search, RAG pipelines, and RBAC. Solved **400+ DSA problems on LeetCode & GeeksForGeeks**. Seeking a Junior Full-Stack / Backend / ML Engineer role to build scalable, impactful software.

TECHNICAL SKILLS

Languages	Python, JavaScript, Java
Frontend	React.js, HTML, CSS, Tailwind CSS, Responsive Design
Backend	Node.js, Express.js, REST APIs, Microservices, JWT Auth, RBAC, Rate Limiting
Databases	PostgreSQL, MongoDB, SQL, Prisma ORM, Query Optimisation
AI / ML	LangChain, RAG Pipelines, FAISS, OpenAI API, Embeddings, Prompt Engineering, TF-IDF, Cosine Similarity, Scikit-learn, Pandas, NumPy
Deep Learning	CNN, Transfer Learning, ResNet50, Data Augmentation, TensorFlow
Cloud & DevOps	AWS (EC2, S3, SES), Docker, CI/CD, GitHub Actions, Git, Linux, Postman
Practices	Agile / Scrum, System Design, RESTful Architecture, OWASP Security, Code Review
DSA	400+ problems solved — LeetCode, GeeksForGeeks

INTERNSHIP EXPERIENCE

Machine Learning & Database Intern — *Elavate Labs* | Remote

2 months | Python, PostgreSQL, Scikit-learn, Docker | Agile Sprints

- Optimised PostgreSQL queries using index tuning and query restructuring, reducing average execution time by **~15%** — directly improving reporting pipeline performance.
- Designed reusable SQL views and stored procedures for automated KPI reporting, reducing manual data extraction effort by **~3 hours/week**.
- Built and tested ML classification pipelines using Scikit-learn following Agile sprint cycles; supported Docker-based CI/CD deployment of ML microservices.

ENGINEERING PROJECTS

Mentora — AI-Powered Tutoring SaaS Platform

github.com/munavvarshaikh314/mentora-backend | Node.js • React • Prisma • PostgreSQL • OpenAI API • LangChain • Docker • AWS

- Key Achievement: Delivered a fully functional production SaaS with microservices architecture — one of the few fresher portfolios with a real deployed AI-powered platform.**
- Designed microservices architecture separating authentication, payments, and recommendation services; Dockerised CI/CD deployment improved API throughput by **~40%** with rate limiting.
- Built RAG pipeline and semantic search using **LangChain, FAISS, OpenAI Embeddings, and Prompt Engineering**, achieving **>85% relevance accuracy** in mentor matching.
- Implemented JWT-based RBAC with role-specific dashboards for students, mentors, and admins; followed OWASP security best practices throughout.
- Followed Agile / Scrum development with iterative sprints, GitHub Actions CI/CD, and modular REST API design.

Secure Payment Gateway System

github.com/munavvarshaikh314/payment-gateway | MERN Stack • Razorpay API • JWT • AWS SES • Two-Factor Authentication

- Key Achievement: Achieved ~99.9% payment success rate across 500+ test transactions — production-level reliability built from scratch.**
- Implemented multi-layer authentication: JWT tokens + two-factor authentication + RBAC, passing all OWASP Top-10 manual security checks.

- Integrated Razorpay UPI/card payment processing with real-time webhook handling and automated PDF invoice generation via AWS SES.
- Built admin dashboard with transaction monitoring, refund management, and exportable reports.

Hybrid Job Recommendation System

github.com/munavvarshaikh314/intelligent-job-recommendation-system | MERN Stack • Python • Scikit-learn • TF-IDF • FAISS • REST APIs

- **Key Achievement: Improved job-candidate match relevance by ~35% over keyword search — validated through offline evaluation on real job datasets.**
- Engineered ML pipeline using TF-IDF feature extraction and cosine similarity ranking; exposed via RESTful APIs integrated with a React frontend.
- Designed scalable backend architecture to handle concurrent recommendation requests with response caching for improved performance.

EDUCATION

B.Tech in Information Technology | Universal College of Engineering, Mumbai | 2025

TARGET ROLES

Junior Full-Stack Developer • Junior Backend Developer (Node.js) • Software Engineer — SaaS / Startups • Junior ML / AI Engineer • Associate Software Engineer • Junior Software Developer

CERTIFICATIONS

- ✓ AWS Certified Cloud Practitioner
- ✓ Machine Learning Specialization — Andrew Ng (Coursera)
